MAIDEN JORC 2012 MINERAL RESOURCE ESTIMATE FOR THE EDIE CREEK MINE PROJECT

Niuminco Group Limited (“Niuminco”, “NIU” or “the Company”) is pleased to advise that on 15 April 2025 it lodged a **Maiden JORC 2012 Indicated Mineral Resource Estimate for ML 511 (the Edie Creek Mine)** with the Mineral Resources Authority (“MRA”) in Papua New Guinea. This Indicated Resource follows the completion in December 2024 of a 14 DDH program and is in respect of one of the seven known and partially mined vein/lode systems at Edie Creek known as the Karuka Main Vein (KMV) Zone.

The JORC 2012 Indicated Mineral Resource Estimate is **13,802 ounces of gold and 123,072 ounces of silver from 519,435 tonnes of ore grading at 1.09g/t with a cut-off grade of 0.3g/t for gold and 0.2g/t for silver. This resulted in 15,032 ounces gold equivalent.**

Drilled holes with surface-projected true horizontal distance of the selected Karuka Vein zone bound by the yellow broken line rectangle

Niuminco looks forward to working with the incoming investor to complete the “Share Purchase and Subscription Deed” in respect of the Edie Creek Mine project over the next two months.

The Company will increasingly direct its focus on advancing the Sellheim and Chillagoe gold/copper projects in Australia, and its Ophir Gold Project in New Zealand. This will include accelerating the current exploration drilling programme on the Ophir mining permit, continuing the bulk sampling/pilot mining operations on one of the Sellheim mining leases and completion of an earlier Sellheim drilling programme.

Released on behalf of the Board of Niuminco Group Limited.

A handwritten signature in black ink, appearing to read "T. Lake", is centered on a light yellow rectangular background.

Tracey Lake,
Managing Director and Company Secretary.
